Report Manager Utility Main Interface

Ad-hoc reporting with database structure

Advanced graphing and analysis

about report manager

The report manager utility provides researchers with a robust tool to leverage the pre-clinical study data to expand the dynamics of how the current LABCAT software modules are used. The report manager provides a seamless interface to access any LABCAT module installed and any study loaded in the system to better manage, track and report on all aspects of data and studies.

key product features

- Visibility to any study at any time
- Standard graphing capability
- Cross-study reporting
- Print and view any standard report
- Interacts with other back-end data systems
- Complete tracking and analytics capability
- Administrator tools for enhanced control
- Seamless interfaces to:
 - Prism
 - Spotfire
 - SigmaPlot
 - IPA Graph Utility

benefits

- Realize faster study results
- Automate the laboratory and business workflow
- Simplified protocol deployment (wizard)
- Improved resource management
- Reduced administration
- Expanded exporting capabilities
- Empower investigators and study directors
- Centralized content
- Rapid deployment
