

Company Summary

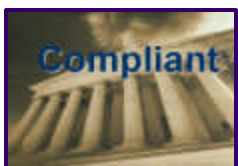

Innovative Programming Associates, Inc. was founded in 1979 and has been developing "best in class" pre-clinical software solutions for the Life Sciences industry for over 25 years. The LABCAT solutions focus on the pre-clinical research phase of the Life Science industry. Our clients include pharmaceutical companies, bio-technology, biopharmaceutical companies, contract research organizations (CRO's), universities, non-profit institutions, and government agencies.

IPA is a **global** laboratory data solution provider that enables clients with 360° visibility of the study process, through an intuitive and comprehensive interface, for the evaluation and reporting of the pre-clinical laboratory study data.

The hallmark of the LABCAT solution is the **flexibility**, ease of use, configuration and maintenance support capabilities. The LABCAT solution modules can be used individually or together as a complete toxicology solution. LABCAT enables a streamlined transition process from a paper-based system to a software based solution.

Compliance is at the core of IPA's products and processes. From the security of 21CFR part11 to the consistency offered through GLP (*Good Laboratory Practice*). Our solutions are used in various organizations where regulatory compliance is essential to their business process.

LABCAT offers clients the capability to **standardize** the entire study process through efficient resource and task management options. The study process and procedures are further harmonized through the use of a library of global dictionaries and protocol templates that incorporate end-users current lexicons.
