

Product Brief

The **LABCAT Necropsy module** is used to collect, analyze and report organ weight data and gross observations.

FEATURES

- Operates stand alone or in a networked environment.
- User-friendly Windows-based technology allows simple data entry via point & click, Hotkeys or hands-free data entry via an optional foot pedal.
- Customized drop-down lists can be easily created by the user to build user-defined lexicons.
- Offers the ability to link related organs.
- Task list ensures that all tasks have been completed.
- Automatically prompts user during data entry to enter data for subjects that are incomplete.
- Interfaces with a wide variety of electronic devices that allows for automated data collection.
- Ability to define protocols and dictionaries at both the global and study levels.
- Communicates with all other **LABCAT** modules.

ANALYSIS AND REPORTS

- All **LABCAT** software solutions include standardized reports complete with statistical analysis including: descriptive statistics, Duncan's, Dunnett's, Kruskal-Wallis, Mann-Whitney, Newman Keuls, Scheffe's, t-test, Tukey test, etc.
- Reports are easily exportable in many different formats; e.g. PDF, CSV RPT, DIF, XLS, HTML Lotus 1-2-3, ODBC, paginated text, record style, report definition, RTF, tab-separated text, tab separated values, text, DOC and XML.
- Reports can be emailed as attachments.
- **LABCAT** reports may be customized using Crystal Reports.
- Raw data report available at time of entry.

SECURITY AND COMPLIANCE

- 21 CFR Part 11
- Electronic signatures
- Individual IDs and passwords with Password Aging
- Audit Trails
- Administrator Authorization and Control
 - Security rights can be set for each user by study
- GLP (Good Laboratory Practices)
 - Automation of data collection
 - Study design and implementation
 - Analysis, Graphing and Tracking
 - Seamless archiving capability
 - Disseminating information and report generation

SYSTEM REQUIREMENTS

- Computer with Windows[®] 2000 or Greater
- 128MB RAM and at least 200 MB of free hard disk drive space
- Serial port or USB connections for laboratory devices
- Data storage device for backing up the entire **LABCAT** system
